Researcher Profiles:
How to create ORCID & Google Scholar profiles

Dr. Fintan Bracken

For links to resources used in this workshop go to: http://www.symbaloo.com/mix/ullibraryresearch
Online Researcher Profiles

- Google Scholar Profile
- ORCID
Google Scholar Overview

- Search tool for academic research that includes different materials from academic publishers, professional societies, online repositories, universities & other web sites such as:
  - Academic journal articles,
  - Books,
  - Theses,
  - Technical reports
  - Abstracts
  - Court opinions
Google Scholar Profiles allow you to:

• Track citations to your publications
• Compute citation metrics including h-index
• View publications by other scientists
• Create a public profile that appears in Google Scholar search results

• For further information see:
  - [https://scholar.googleblog.com/](https://scholar.googleblog.com/)
Google Scholar Researcher Profile

Create an email alert for new citations to your publications

• **h-index** is a metric to quantify the scientific output of a researcher. A h-index of 3 means that of all of the papers written by this author, 3 papers have been cited at least 3 times each.

• **i10-index** is the number of publications with at least 10 citations
Google Scholar Researcher Profiles - Benefits

• Increases the visibility of your research
• Allows easier access to all your publications for other researchers, particularly if you deposit all of your publications in the UL Institutional Repository (http://ulir.ul.ie/)
• Increases the chances of other researchers finding and reading your publications which in turn may result in them citing your work and increasing your citations
How to set up a Researcher Profile

Step 3: Updates

Profile updates

- We'll use a statistical authorship model to identify new articles that you write. We may also update bibliographic information for articles in your profile or identify duplicate article records, which could be merged or deleted. How would you like to handle these changes?
  - Automatically update the list of articles in my profile. (recommended)
  - Don't automatically update my profile. Send me email to review and confirm updates.

- You can also add and remove individual articles, update their bibliographic data, and merge duplicate records. Rest assured, our automatic updates will preserve your edits and will not override them.

- We'll collect and display citations to your articles from all of Google Scholar. The citations will update automatically to reflect changes in your profile and in Google Scholar.

To export your references, select references using the tick boxes and then choose:
- BibTeX to export to ORCID
- EndNote or RefMan to export to EndNote
- CSV to export as an Excel spreadsheet.
ORCID = Open Researcher and Contributor ID

“ORCID is like a DOI for researchers”
http://orcid.org/0000-0002-1228-5109
ORCID helps you to:

- Ensure your work is **discoverable** & connected to you throughout your career
- Eliminate name ambiguity, distinguishing you from other researchers & ensuring your work is easily identifiable as yours (i.e. proper attribution)
- Save time by **associating your existing IDs** with ORCID & exchanging profile and/or publication data between them
Eliminate Name Ambiguity

ORCID is a hub connecting the research landscape

- **Funders**: Embedding ORCID identifiers in their grant submission systems and awardee databases
- **Universities**: Opportunities for integration with:
  - Researcher profile systems
  - Institutional repositories
  - Grants & contracts
  - HR systems
  - Safety/research conduct training & compliance
- **Professional societies**: Associations are integrating into membership renewal, publishing and meeting registration processes
- **Publishing & repositories**: Publishers are integrating into manuscript submission and author/reviewer databases
  - Repositories linking with deposition, search and updating
  - Both are linking internal ID with ORCID record

ORCID.org
Distinguish Yourself

DISTINGUISH YOURSELF IN THREE EASY STEPS

ORCID provides a persistent digital identifier that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized. Find out more.

1. REGISTER  Get your unique ORCID identifier Register now! Registration takes 30 seconds.

2. ADD YOUR INFO  Enhance your ORCID record with your professional information and link to your other identifiers (such as Scopus or ResearcherID or LinkedIn).

3. USE YOUR ORCID ID  Include your ORCID identifier on your Webpage, when you submit publications, apply for grants, and in any research workflow to ensure you get credit for your work.
1. Register for an iD

- Registration is easy. Signing up for an ORCID iD only takes seconds. Then, enhance your ORCID record with your professional activities and begin to use your ORCID iD as you submit publications, apply for grants, and in any research workflow to ensure you get credit for your work.
You control the privacy

- You determine what, how, and with whom the information in your ORCID record is shared.

Default privacy for new Works

Who can see this?
- everyone
- trusted parties
- only me

More information on privacy settings
Fintan Bracken

**Biography**

My current role as Research Services & Bibliometrics Librarian involves developing and providing high quality, innovative services to support the University of Limerick’s research community. I previously worked in the Marine Institute's research library and with IRIS Electronic Information Services Ltd. / IRel. I have conducted research on bird biodiversity in various farmland, woodland and peatland habitats during my PhD and post-doctoral studies in University College Dublin.

- ISNI2ORCID search and link
2. Connect your ORCID iD: Link to other identifiers

Associate your ORCID iD with ResearcherID
www.researcherid.com

Exchange profile and/or publication data between ORCID and ResearcherID
2. Connect your ORCID iD: Link to other identifiers

Associate your Scopus Author Profile ([www.scopus.com](http://www.scopus.com)) with your ORCID iD

Exchange profile and publication data between ORCID and Scopus
2. Connect your ORCID iD: Import from Google Scholar or manually add works.
Research Services: Profiles & Promoting Research

The Glucksman Library's guide to assist researchers with all aspects of the research process from finding information to maximising impact.

### Promoting Your Research Online

As the volume of publications continues to increase rapidly throughout the world, it is becoming more important to promote your research outputs to ensure that they don’t go unnoticed.

One method of promoting your research is to create a profile on an academic social networking site and add the details of your publications. There are several different sites including Mendeley, ResearchGate, Academia.edu and the Social Science Research Network. Check out the current users of the different sites and speak to colleagues before deciding which academic social networking site you will create your profile in. Also, this simple guide may help you decide on what network(s) to join.

Social media can be useful means for publicising your research and also engaging with your audience.

- **Blogs** – write about your research and other developments in your field ([www.blogger.com](http://www.blogger.com) or [www.wordpress.com](http://www.wordpress.com))
- **Twitter** – promote your research and receive feedback on your publications
- **YouTube** – recordings of presentations or other videos to showcase your research
- **Slideshare** – put up slides from conferences you presented at to further promote your research activities

### Digital Identity Healthcheck for Academics

This short video guide from Piirus will show you how to conduct your own digital identity healthcheck.

---

**Researcher Profiles**

Ensuring your research is easily identifiable is very important and can be achieved by:

- Always using the same version of your name consistently throughout your career e.g., always use either the English or Irish version of your name but not both, never shorten your name, and always either include or exclude your middle initial(s)
- When publishing, always use the same institutional name variant
- Creating online researcher profiles.

There are a number of researcher profiles that you can create including ULRIS, ORCID, ResearcherID and Google Scholar Researcher Profiles. This recorded presentation will explain why it is useful to create researcher profiles and the various online resources that are available.

---

**ULRIS (UL Research Information System)**

It is important to add all your publications to ULRIS, UL’s Research Information System. ULRIS will automatically download your new publications from Web of Science and allow your academic profile to automatically feed your department’s website. More information on ULRIS can be found at [http://www2.ul.ie/webWww/Services/Research/Research_Information_System](http://www2.ul.ie/webWww/Services/Research/Research_Information_System).
